H.W. Wilson Announces the Twenty-Second Edition of
Fiction Core Collection

Fiction Core Collection is a selective list of classic and contemporary works of adult fiction either written or translated into English. This new edition emphasizes equity, diversity, and inclusion, representing voices from a wide variety of communities.

Since the last edition, thousands of titles have been added to now include more than 7,500 of the most highly recommended titles, all carefully selected by experienced librarians from public library systems, schools, and academic libraries across the United States. These titles constitute a shortlist of the essential books in a given category or on a given subject.

This title is divided into two parts: **List of Fictional Works,** which is arranged alphabetically under main entry, usually the author; and **Indexes**, which provides a name, title, and subject index along with access by genre, form, and literary technique within the title and subject index.

Featured Meta Data Includes:
- Precise genres and sub-genres
- Subject headings with location and time period
- Number of awards
- The name of series if applicable

Each entry includes a full bibliographical description with detailed information about the publisher, date of publication, paging, ISBN, and Library of Congress control number. Additionally, notes regarding sequels and publication history, a descriptive abstract, and excerpts from review sources such as *Library Journal* and *Booklist*, are included within each entry.

Starred Entries are our highest recommendation level and are easily identified with a starred listing throughout the text. The stars are included in the index as well so users can easily identify the most highly recommended titles by author, series, or by subject area.
