[Learn More](#)

Delivering a core list of key headings, together with patterns and examples to guide the cataloger in creating further headings as required, the **Sears List** has been the standard thesaurus of subject terminology for small- and medium-sized libraries since 1923.

The title uses natural language as suggested subject headings, language that makes sense to library patrons who are looking for materials of interest. The world of libraries in the twenty-first century has changed rapidly. Information is available in machine-readable form and internet access has transformed the way many users seek and find information.

The 24th Edition of the **Sears List** keeps pace by adding dozens of new subject headings to its core list and replacing subjects that now have a different preferred term, using language that makes the most sense to catalogers and the patrons in their library.

This essential resource features:

- Easy-to-use thesaurus-like format, with an emphasis on subject terms that makes sense to catalogers and library patrons;
- Helpful guidance on which subject terms to use for thousands of categories of information;
- Helpful notes outlining Used For, See Also, Broader Terms, Narrower Terms, and Related Terms;
- New and revised headings including Scope Notes to clarify the specialized use of a term or to distinguish between terms that might be confused; and

- Resource Description and Access (RDA) compliant headings, providing comprehensive instructions and guidelines for formatting bibliographic data.

## **New to this 24th Edition**

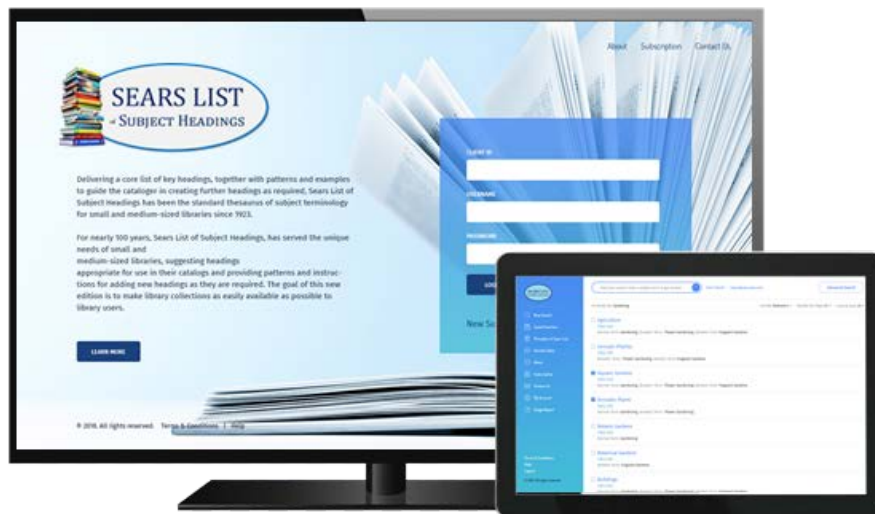

Always mindful of the goal of meeting the changing needs of library users, this new edition includes dozens of new subject headings corresponding to current literature and cataloger expectations, and many terms that have been replaced with newer terminology. This includes addressing the growing literature in the areas of:

- Diversity
- Technological Advances
- Racial Equality
- Pop Culture
- Societal Changes
- Literature Genres
